

REDAR ABDÜLKERİM

FLUTTER & FRONT-END DEVELOPER

Ankara, Türkiye | +90 533 079 0788 | redarreda8@gmail.com

[LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Flutter & Front-End Developer with hands-on experience building and shipping production mobile and web applications. Front-end development experience since 2018 and software/mobile development since 2023, with strong skills in Flutter, Dart, Firebase, React, JavaScript, Node.js, REST APIs and Cloudflare Workers. Creator of NaviDo, a published Android productivity app, with practical experience across UI implementation, secure API integrations, notifications, maps, subscriptions, debugging, testing and release management.

CAREER HIGHLIGHTS

Front-End since 2018	Software & Mobile Development since 2023
Creator of NaviDo - Google Play	Production Flutter/Firebase experience

CORE TECHNOLOGIES

Flutter • Dart • Firebase • React • JavaScript • Node.js • Express.js • REST APIs • Cloudflare Workers • Git

PROFESSIONAL EXPERIENCE

Software & Mobile Developer Freelance <i>Ankara, Türkiye</i>	2023 - Present
- Develop cross-platform mobile applications from requirements and UI implementation through Firebase/API integration, testing, debugging and production release. - Build Flutter/Dart applications with authentication, notifications, maps, location-aware workflows and subscriptions; integrate REST APIs and serverless services when required. - Own product implementation quality across responsive UI, reliability, performance and release validation.	
Front-End Developer Freelance	2018 - Present
- Develop responsive web interfaces using React, JavaScript, HTML5, CSS3 and Bootstrap across desktop and mobile breakpoints. - Translate UI/UX concepts and product requirements into reusable, maintainable interfaces and integrate dynamic API-driven states. - Troubleshoot front-end issues and improve usability, responsiveness and performance through iterative delivery.	
Software Developer Zina Erbil <i>Remote</i>	2023 - 2025
- Developed a production Flutter/Dart/Firebase e-commerce application with authentication, product discovery, search/filtering, favorites, cart, address management, ordering and push notifications. - Collaborated on requirements, debugging, iterative improvements and release readiness with attention to performance and user experience.	
IT Support Specialist Medium Company	2015 - 2018
- Provided end-user technical support and diagnosed hardware, software, network and system issues. - Maintained IT infrastructure and supported system reliability, security and day-to-day operations.	

FEATURED PRODUCT

NaviDo - Smart Context-Aware Productivity App | Creator & Software Developer

Flutter | Dart | Firebase | Cloudflare Workers | FCM | App Check | Google Maps | RevenueCat

- Independently designed, developed and published a production Android productivity application with contextual reminders based on time, location, nearby places, weather and traffic.
- Secured Firebase Authentication and FCM with App Check and a Cloudflare Workers backend; implemented caching and provider fallback to reduce unnecessary API usage.
- Integrated Google Maps, RevenueCat subscriptions, background notification workflows and Android AAB build/release validation while owning UI/UX, testing and reliability.

SELECTED PROJECTS

Zina Erbil - E-Commerce Mobile Application | Software Developer

Flutter | Dart | Firebase | Authentication | FCM | UI/UX

- Built core e-commerce workflows including email registration and verification, product search/filtering, favorites, cart, address management and ordering.
- Implemented cash-on-delivery, push notifications and customer-support flows; contributed to debugging, performance improvements and production release readiness.

Doctor Appointment Management System | Front-End & Software Developer

React | JavaScript | Bootstrap | Node.js | Express.js | Firebase | Firestore

- Built a responsive appointment-management application with admin workflows for creating, viewing and managing patient appointments across desktop, tablet and mobile.
- Integrated Firebase Authentication and Firestore with dashboard metrics, appointment status tracking, search/filtering and duplicate date/time validation; connected backend services through Node.js and Express.
