PROFESSIONAL SUMMARY

Software Developer with hands-on experience building and shipping mobile and web applications across front-end, backend/API integration and cloud services. Strong in Flutter/Dart, React/JavaScript, Firebase, Node.js/Express and Cloudflare Workers. Creator of NaviDo, a published Android productivity application using context-aware reminders, maps, notifications, secure serverless APIs and subscriptions. Combines product ownership, responsive UI development, debugging and release experience with an earlier professional IT support background.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android

Front-End: React, JavaScript (ES6+), HTML5, CSS3, Bootstrap, responsive design

Backend & APIs: Node.js, Express.js, Cloudflare Workers, REST APIs, API integration, caching/provider fallback

Firebase & Services: Firebase Authentication, FCM, App Check, Google Maps, RevenueCat

Development: Git, debugging, testing, release validation, performance, UI/UX, Figma

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer | Independent / Freelance

2018 - Present

Software & Mobile Developer

2023 - Present

Ankara, Türkiye

- Develop and deliver responsive web and cross-platform mobile applications from requirements and UI implementation through API integration, testing, debugging and release.
- Build Flutter/Dart applications with Firebase, notifications, maps, location-aware workflows and subscriptions; develop React/JavaScript interfaces and Node.js/Express or Cloudflare Workers APIs when required.
- Translate product and UI/UX requirements into reusable interfaces, troubleshoot production issues and improve reliability, performance and usability.

Software Developer | Zina Erbil

2023 - 2025

Remote

- Developed a Flutter/Dart/Firebase e-commerce application with responsive interfaces, authentication, product search/filtering, favorites, cart, address management, ordering and push notifications.
- Collaborated on requirements, debugging, iterative improvements and production-release readiness with attention to performance and user experience.

IT Support Specialist | Medium Company

2015 - 2018

- Provided end-user technical support, diagnosed hardware/software/network issues and maintained IT infrastructure, reliability and security.

SELECTED PROJECTS

NaviDo - Context-Aware Productivity App | Creator & Software Developer | [Google Play](#)

Flutter | Dart | Firebase | Cloudflare Workers | FCM | App Check | Google Maps | RevenueCat

- Independently designed, developed and published a production Android productivity app with Arrive/Leave geofencing, Nearby, Weather, Traffic, Smart Day and background-notification workflows.
- Secured Firebase Authentication/FCM with App Check and a Cloudflare Workers backend; implemented shared caching and provider fallback to reduce unnecessary API usage.
- Integrated Google Maps, RevenueCat subscriptions and Android release/AAB validation while owning UI/UX, testing, reliability and release quality.

Zina Erbil - E-Commerce Mobile Application | Software Developer

Flutter | Dart | Firebase | Authentication | Push Notifications | UI/UX

- Built a Flutter/Firebase e-commerce experience with verified-email registration, product discovery, search/filtering, favorites, cart and address management.
- Implemented ordering, cash-on-delivery, push notifications and customer-support flows; contributed to debugging, performance and release lifecycle.

Climaverse - Responsive Weather Web App | Front-End Developer

React | JavaScript | HTML5 | CSS3 | Bootstrap | REST APIs | Responsive UI

- Developed a responsive React weather application using external APIs for current, hourly and multi-day weather information.
- Built reusable UI components, city search and dynamic weather states with JavaScript, Bootstrap and responsive CSS for desktop and mobile.

EDUCATION & DEVELOPMENT

Tishk University | Information Technology | 2010 - 2014

Language of instruction: English | **Turkish degree equivalency:** in progress

Web Development Bootcamp | Cohort 1
